

Matteo Graizzaro

Game Programmer

Game Developer with 4+ years of experience building multiplayer systems and live-ops features for mobile games.

I thrive at the intersection of clean code and player experience — specialized in C#, Unity, Unreal, and TypeScript, with a track record of shipping player-facing features that measurably improve retention and engagement. Comfortable working across client and server, I've grown through collaborative environments that showed me how vast and dynamic this industry really is. That variety is what keeps me driven — I'm always looking for the next challenge and system to learn.

Mid Game Developer - Burraco Team

- Integrated **Claude** into my workflow to build and maintain internal web tools around our APIs, and to analyze, summarize, and draft technical design documents
- Used **GitHub Copilot** to generate test suites, plan work, investigate bugs, and quickly ramp up on unfamiliar codebases
- Collaborated with the UI/UX Department to develop an on-boarding feature that led to an improve in D3 Retention, D7 number of Matches finished, D7 hours spent in game and Adv. revenues, between +6 and +8%
- Proactively supported the Customer Care Department, by giving them new tools for in-depth access of players' data, enhancing their overall productivity
- Produced technical specifications for more than 10 features from their game design documents, and implemented them afterwards.
- Reworked the tutorial of features, leading to an increase of **100%** in the user's effectiveness
- Tested the game extensively to spot and sequentially fix bugs and other edge cases
- Took responsibility for migrating most of the game features from the existing GameSparks-based server infrastructure to a Nakama one

What steam will look like in 3 years

[Read More](#)

Jan 2021 I Gamasutra [Featured on the front page]

By analyzing data gathered using Steam's official API, I try to predict the prices, numbers, and genres of games that will be released between 2021-23.

Going deep in the Steam reviews

[Read More](#)

Jun 2020 I Gamasutra

What can be said about the first 3 years of a free Steam game called Robocraft, by analyzing its review numbers and score, gathered using Steam's official API.
